Using the power of technology to engineer a better future

UST was born digital. It's the core of what we are. We help the world's best companies transform. We're your partner, not just another vendor. Our team is made up of people who care about you and what you do. We believe in transparency and trust so that we can serve you better. And ultimately, we love helping people thrive. Our nimble, creative approach —from start to finish— is to work together with you to make your ideas a reality. Through our proven methods and expert guidance, we craft solutions tailored to your needs and build out while others only dream. We live our values. Every day, every client, and every deliverable is defined by our core values.

Our core values

Humility
Humanity
Integrity

UST and TreasuryPay

UST, a leading digital transformation solutions company, and TreasuryPay, a real-time data and intelligence leader will partner to accelerate innovation in the financial sector.

Prominent global corporations count on TreasuryPay to provide real-time actionable data and intelligence based on its InstantPlatform and product suite. UST brings two decades of deep domain experience in providing technology solutions, and its dynamic toolbox has reimagined and redefined digital transformation.

UST's system integration capabilities will amplify and enhance the benefits offered by TreasuryPay solutions, increasing the scope of UST's dynamic array of service offerings across a broad range of sectors including finance, architecture, data integration and implementation services.

Service offerings for a better tomorrow, today.

Modernization

UST's end-to-end cloud transformation solutions enable financial services firms to accelerate speed to market and eliminate technical debt. They can full-scale adoption of cloud infrastructure, DevOps, application modernization, and data management.

Engineering

UST's agile framework and innovation ecosystem can build financial services firms a minimum viable product in as short as 3-6 weeks. Together, we'll engineer future-proof products that are flexible, innovative, highly monetizable, and that your customers love.

Data and analytics

UST helps financial services firms harness AI/ML and predictive analytics to build correlations between multiple data types to reveal critical business insights. Our data management tools and AI/ML platforms can transform large data sets into quantitative and qualitative insights.

Enterprise application services

UST transforms financial services firms' enterprise applications into innovative tools for change. Our team will help you implement, extend, support, and upgrade applications. Our in-depth expertise and on-premises or cloud implementation capabilities deliver an end-to- end transformation experience that leaves a lasting impact.

Cloud implementation

UST's cloud ecosystem is a web of platforms, accelerators, methodologies, resources, and innovation labs that work together to reimagine your financial services business. We increase market speed, applying novel approaches to your challenges while meeting regulatory, legal, and compliance requirements. We have a deep commitment to collaboration and a powerful network of inspiring experts.

About UST

For more than twenty years, UST has partnered with the world's leading companies to transform them with technology, inspire them with people, and drive them toward growth with purpose. Using advanced analytics, cloud computing, and innovative technologies, we partner with our clients from concept to production. Our team has extensive experience working with industry leaders who leverage us to deliver measurable results in key areas such as customer service, employee engagement, operational efficiencies, product development, and marketing initiatives.

About TreasuryPay

TreasuryPay provides organizations with Instant® global intelligence from a single data network. Its groundbreaking platform enables instantaneous visibility on global transactions – including key functions such as receivables, reconciliation, F/X, liquidity management, supply chain, marketing, and performance management. TreasuryPay delivers this capability via a highly-secure SaaS platform with connectivity to all banks, payment processors, and payment types – worldwide – with seamless integration for addressing today's most complex financial challenges. TreasuryPay enables large, complex organizations to streamline vital processes, protect against loss, and accelerate growth through better data-driven decisions.
